22

22

Without a strong foundation...

- ☐ There is a lack of understanding of how SAFe enables Business Agility
- ☐ We struggle with the concepts of MVPs and “Lean startup” thinking
- ☐ We organize around projects rather than product-focused value streams
- ☐ We don’t really focus on relentless improvement
- ☐ SPCs struggle to effectively change the organization

1. Strengthening the foundation for Business Agility

23

23

Without empowered teams and clear roles...

- ☐ There is a lack of clarity around the SAFe roles and responsibilities needed to deliver value
- ☐ Some roles are not working effectively
- ☐ We don't have the 'Team Coaching' skills needed to build high-performing teams
- ☐ Teams and ARTs may not be adequately connected to their customers
- ☐ Product Management and System Architects don't work together to manage priorities

2. Empowering teams and clarifying responsibilities

24

24

Without an effective flow of value...

- ☐ Teams and ARTs struggle to deliver a continuous flow of value
- ☐ We don't seem to move initiatives through the Portfolio efficiently
- ☐ The flow of work is not understood or visualized at each level of the framework
- ☐ Built-in quality practices are not well established nor consistently applied across business and technology domains
- ☐ Our leaders may not understand how we can help optimize the end-to-end flow of value

3. Accelerating value flow

25

25

Without extending SAFe beyond IT...

- ☐ The SAFe implementation is siloed inside of IT
- ☐ There is a lack of understanding of how to apply SAFe to the business
- ☐ ARTs do not have the business people needed to deliver the full business solution
- ☐ Lean-agile practices are not being applied to streamline business operations
- ☐ Senior leadership may not always fully understand or exemplify Lean-Agile ways of working

4. Enhancing Business Agility with SAFe across the business

26

26

Without embracing AI, Big Data and Cloud...

- ☐ Our leaders and business stakeholders don't have a good understanding of emerging AI technologies
- ☐ The opportunities for leveraging AI inside our organization are not well understood
- ☐ We are not organized effectively for delivering AI Solutions
- ☐ We are not able to gather or apply Big Data to make informed, fact-based decisions
- ☐ Our strategy for migrating enterprise systems to the Cloud is unclear or too slow

5. Building the future with AI, Big Data and Cloud

27

27

Without measuring competency, flow and outcomes...

- ☐ Our approach to metrics is nonexistent, inconsistent, overly complex, or not well-defined
- ☐ We don't have a good sense of our proficiency across the SAFe seven core competencies
- ☐ We don't know how to measure and improve flow at each level of the framework
- ☐ We don't use KPIs and OKRs to define outcomes
- ☐ Our metrics are not used to clearly identify improvement actions

6. Delivering better outcomes with Measure and Grow and OKRs
